Eyepiece Adapter

Allows attachment of a 23.2 camera adapter equipped with different size eyepiece holder

Useful for either prime-focus or eyepiece-projection astrophotography with refractors or reflector telescopes

Accepts 30mm, 30.5 mm or 31.75 mm eyepiece inside for eyepiece camera

Slides into 30mm, 30.5 mm or 31.75 mm eyepiece holder; has tight size for attachment of camera body

Specification

Eyepiece Adapter for Microscope and Telescope Camera

Eyepiece adapter is used to connect the 23.2 mm camera adapter to different size microscope or telescope eyepiece tube holder size.

Most of our camera adapters are with 23.2 mm size and can be directly fit any of the 23.2 tube holder such as biological microscope. So for the 23.2mm tube holder, no such eyepiece adapter is needed.

However, for 30 mm tube holder, you need to use Dia.23.2mm to 30.0mm Ring to connect your 23.2mm camera adapter

For 30.5 mm tube holder, you need to use Dia.23.2mm to 30.5mm Ring to connect your 23.2mm camera adapter.

For 31.75 mm tube holder, you need to use Dia.23.2mm to 31.75mm Ring to connect your 23.2mm camera adapter(You can also select our camera adapter(C-Mount to Dia.31.75mm Ocular Tube) directly.

Item	Article Code	Model	Description
13	108015		MET2323000 Dia.23.2mm to 30.0mm Ring
14	108016		MET2323050 Dia.23.2mm to 30.5mm Ring
15	108017		MET2323175 Dia.23.2mm to 31.75mm Ring
